

Yes. Below is the **full** `TourDetails.jsx` , modified directly from your current version.

I have added the **dynamic tour gallery** in the correct position: **after the hero and before the main tour content**. It uses the images already coming from:

```
GET /api/tours/{id}/images
```

It also includes a **click-to-open lightbox**, previous/next navigation, image counter, keyboard support, and safe handling when there are no images.

```
import { useEffect, useState } from "react";
import { Link, useParams } from "react-router-dom";

import {
  getTourBySlug,
  getTourPrices,
  getTourImages,
} from "../services/tourService";

const TourDetails = () => {
  const { slug } = useParams();

  const [tour, setTour] = useState(null);
  const [prices, setPrices] = useState([]);
  const [images, setImages] = useState([]);

  const [loading, setLoading] = useState(true);
  // ...
}
```

## What changed

Your existing architecture is preserved. The important additions are:

### 1. Gallery state

JavaScript

### 2. Gallery rendering

```
Hero
  ↓
EXPERIENCE GALLERY
  ↓
THE EXPERIENCE
  ↓
HIGHLIGHTS
  ↓
PRICING
  ↓
PLAN WITH CONFIDENCE
```

BOOKING SIDEBAR

### 3. Every database image is rendered dynamically

```
{images.map((image, index) => (
```

JavaScript

### 4. Primary image gets a special class

```
image.is_primary
```

JavaScript

### 5. Click any image to open it full-screen.

### 6. Previous / next navigation is included.

### 7. Keyboard controls

- Esc → close
- ← → previous
- → → next

### 8. Mobile/accessibility considerations are built into the markup.

### 9. No images are hardcoded into React. The page receives them from PostgreSQL through your PHP API.

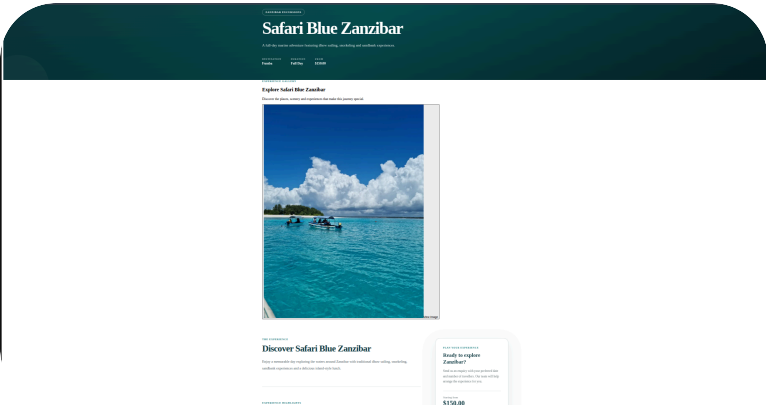

## Important: CSS is the next step

This JSX now expects these gallery/lightbox classes:

```
tour-details-gallery  
tour-gallery-header  
tour-gallery-grid  
tour-gallery-item  
tour-gallery-primary  
tour-gallery-overlay  
tour-lightbox  
tour-lightbox-content  
tour-lightbox-close  
tour-lightbox-prev  
tour-lightbox-next
```

tour-lightbox-caption  
tour-lightbox-counter

Don't add random images yet. Your Safari Blue image is already correctly connected to tour 1 , so first run the frontend and confirm that the gallery appears. After that, the next step should be to build the premium responsive CSS for this gallery and lightbox, rather than changing the PHP/database structure.

[Home](#)/[Tours](#)/Safari Blue Zanzibar

Zanzibar Excursions

## Safari Blue Zanzibar

A full-day marine adventure featuring dhow sailing, snorkeling and sandbank experiences.

DESTINATIONFumba

DURATIONFull Day

Show more ▾

Yes — the screenshot confirms that the React/API integration is working correctly. The Safari Blue image is successfully coming from PostgreSQL → PHP API → React → Cloudinary.

The problem now is presentation/CSS, not the backend.

## What I can see from your screenshot

The gallery currently appears as:

- One very large portrait image.
- No premium gallery grid.
- View Image is appearing as tiny text.
- The page has excessive white space.
- The gallery does not yet look like a professional tourism website.
- The lightbox functionality is present in the JSX but needs proper styling.
- The rest of your page is also very compressed because the gallery has not been given its intended layout.

We should **not change your PHP or PostgreSQL code**. The image pipeline is already correct.

## Next step: add the gallery CSS

Add the following to the CSS file where your existing `tour-details-*` styles are defined.

```
/* =====
TOUR GALLERY
===== */

.tour-details-gallery {
  padding: 90px 0;
  background: #ffffff;
}

.tour-gallery-header {
  max-width: 720px;
  margin-bottom: 35px;
}

.tour-gallery-header .tour-section-label {
  display: block;
  margin-bottom: 12px;
}

.tour-gallery-header h2 {
  margin: 0 0 14px;
}
```

```
.tour-gallery-header p {
    margin: 0;
}

/* =====
   GALLERY GRID
===== */

.tour-gallery-grid {
    display: grid;
    grid-template-columns: 2fr 1fr;
    grid-template-rows: repeat(2, 260px);
    gap: 16px;
    width: 100%;
}

/* =====
   GALLERY ITEM
===== */

.tour-gallery-item {
    position: relative;
    display: block;
    width: 100%;
    height: 100%;
    padding: 0;
    margin: 0;
    border: 0;
    overflow: hidden;
    cursor: pointer;
    background: #eeeeee;
    border-radius: 2px;
    appearance: none;
    -webkit-appearance: none;
}

/* =====
   PRIMARY IMAGE
===== */

.tour-gallery-primary {
    grid-row: 1 / 3;
}

/* =====
```

```
IMAGE
===== */

.tour-gallery-item img {
  display: block;
  width: 100%;
  height: 100%;
  object-fit: cover;
  transition:
    transform 0.7s cubic-bezier(0.22, 1, 0.36, 1),
    filter 0.5s ease;
}

/* =====
HOVER IMAGE EFFECT
===== */

.tour-gallery-item:hover img {
  transform: scale(1.045);
}

/* =====
DARK OVERLAY
===== */

.tour-gallery-overlay {
  position: absolute;
  inset: 0;

  display: flex;
  align-items: flex-end;
  justify-content: flex-start;

  padding: 24px;

  background:
    linear-gradient(
      to top,
      rgba(0, 0, 0, 0.58),
      rgba(0, 0, 0, 0.08) 55%,
      transparent
    );

  opacity: 0;

  transition:
    opacity 0.35s ease;
```

```
}
```

```
/* =====  
    SHOW OVERLAY  
===== */
```

```
.tour-gallery-item:hover .tour-gallery-overlay,  
.tour-gallery-item:focus-visible .tour-gallery-overlay {  
    opacity: 1;  
}
```

```
/* =====  
    VIEW IMAGE LABEL  
===== */
```

```
.tour-gallery-overlay span {  
    display: inline-flex;

    }

}
```

One important issue

Your current Safari Blue tour has **only one image** in PostgreSQL:

```
tour_id = 1
Safari Blue Experience
is_primary = true
```

Therefore the grid cannot look like a multi-image gallery yet.

Once we add more **genuinely Safari Blue/Fumba-relevant images**, the layout will automatically become:

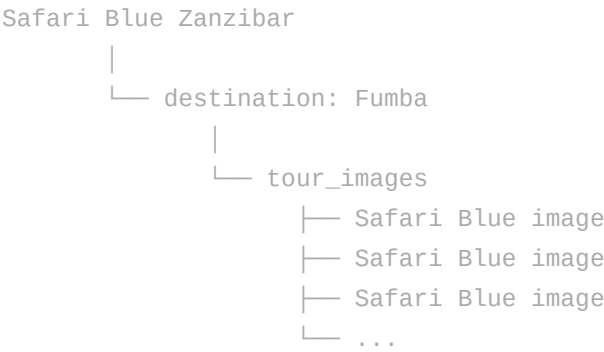

And if there are more images, we can evolve it into a more sophisticated premium gallery.

Don't add the other Cloudinary images to Safari Blue yet

For example, Prison Island, Jozani Forest, Stone Town, Dolphin Adventure, Spice Farm, Nungwi, etc. should not be inserted into tour\_id = 1 merely to fill the gallery.

Your database relationship is correctly designed:

This will keep the website professionally accurate.

So your current status is:

- PostgreSQL ☒
- PHP API ☒
- Cloudinary ☒
- React service ☒
- React gallery ☒
- Lightbox logic ☒
- Premium CSS ☐ add now
- More relevant
- Safari Blue
- images ☐ next

After adding this CSS, refresh localhost:5173/tours/safari-blue-zanzibar . The single image should become a properly sized premium gallery rather than the huge unstyled image shown in your screenshot.

modify in it then give me full and correct one: /\*  
=====

## TOUR SECTION

```
===== */

.tours-section {

    padding: 100px 7%;
```

Show more ▾

Absolutely. I'll merge the **premium gallery/lightbox styles** into your existing stylesheet and also correct the malformed CSS in the version you pasted, especially:

- `\/*` → proper `/*`
- `\#` → proper `#`
- `*background*` → proper `background`
- `\:hover` → proper `:hover`
- Gallery styling added without changing your existing PHP/API architecture.
- Responsive behavior for desktop, tablet, and mobile.
- A better layout when there is **only one image**.
- A better layout when you later add **2, 3, or more relevant tour images**.
- Lightbox styling matching the existing premium Zanzibar design.

Replace your current CSS with this **full corrected version**:

```
/* =====
   TOUR SECTION
===== */

.tours-section {
    padding: 100px 7%;
    background: #f8f7f3;
}

.section-heading {
    max-width: 720px;
    margin: 0 auto 60px;
    text-align: center;
}
```

```
.section-heading > span {
  font-size: 13px;
  font-weight: 700;
  letter-spacing: 3px;
  text-transform: uppercase;
  opacity: 0.65;
}

.section-heading h2 {
  margin: 15px 0;
  font-size: clamp(32px, 4vw, 52px);
  line-height: 1.1;
}

.section-heading p {

What you should see now

With your **current one Safari Blue image**, it will no longer appear as that narrow portrait block from your screenshot. It will use the single-image gallery rule and occupy a much more intentional gallery area:

When we eventually add **three genuinely Safari Blue/Fumba images**, it will automatically become:

And clicking an image opens the dark full-screen viewer with:

- × Close
- ← Previous
- Next →
- Image counter, e.g. 1 / 3
- Image caption
- Esc to close
- ← and → keyboard navigation
- Mobile-friendly controls

One important point

I intentionally **did not add the other Cloudinary images to the Safari Blue gallery**. Your current image is correctly associated with:

The next database step should be to identify/create the appropriate tours and then assign each relevant Cloudinary image to its **correct tour**, rather than filling galleries with unrelated Zanzibar photos.

ChatGPT can make mistakes. Check important info.
